**SUSTAINABLE PRODUCTS
FOR A BETTER CARBON FOOTPRINT**

FROM DISPOSABLE TO DURABLE: A SUSTAINABLE SHIFT

Our goal is to make the promotional products market more sustainable and the world a cleaner place. That is why we offer a wide range of circular alternatives to disposables and are constantly introducing new, sustainable products.

We work closely with social organizations that are committed to a cleaner planet. Together we increase our impact and directly contribute to a cleaner environment.

In addition, we want to do more than just sell products. We want to tell stories that inspire and bring about change. Stories about the origin of our materials, about the impact of our products and about the people who work with us on a better future. In this way, we want to leave a positive footprint on our planet.

We hope to inspire people to live more consciously and work together on a sustainable future.

**REDUCE,
REUSE
AND
RECYCLE**

SEAQUAL

The SEAQUAL® Initiative collects marine litter and transforms PET bottles into 100% recycled PET yarn, produced in Spain. The SEAQUAL®-YARN contains around 11% ocean waste. Their yarns are used in the SeaTowel en AquaSocks.

REPREVE®

Repreve® is a leading fiber producer. Their fibers are made from recycled materials including plastic bottles which are mainly collected near beaches around the world. Their yarns are used in the BottleTowel, BottleBlanket Fleece, BottleBlanket Picknick and the Motivate microfiber sporttowel.

RECOVER

Recover transforms post-industrial and post-consumer textile waste into valuable and high-quality recycled cotton fibers. Their yarns are used in the SeaTowel, SeaTowel Kitchen and GoodTowel.

OEKOTEX STANDARD 100

OEKO-TEX® STANDARD 100 is a label for textiles tested for harmful substances. It sets the benchmark for textile safety, from yarn to finished product. Every item bearing the STANDARD 100 label is certified as having passed safety tests for the presence of harmful substances.

PLASTICSOUP

We donate 5% of the profit to the Plastic Soup Foundation (PSF). The PSF wants to reduce the amount of microplastics in the sea.

SEAQUAL INITIATIVE

Plastic is destroying marine life like never before. The Seaqual-initiative cleans oceans and rivers from plastic. The waste is delivered to processing plants where PET bottles are selected. They are cleaned and shredded to obtain small PET chips.

REHEAT PET

Polyethylene terephthalate (PET) has the ability to be reheated and reused easily. The PET chips are reheated and filtered to remove contamination. The result is chopped in smaller similar resins which is a new recycled raw material.

SEAQUAL™
Recycled plastic from the sea

MAKING SEAQUAL®-YARN

The recycled PET resins are used to make high quality SEAQUAL®-YARN. This yarn is always white. We combine it with recycled cotton to make our SeaTowel and AquaSocks.

TOGETHER WE CAN CLEAN THE OCEANS

WE ARE PARTNER OF THE THE SEAQUAL INITIATIVE TO MAKE SUSTAINABLE PRODUCTS WIT SEAQUAL®-YARN. TOGETHER WE WANT TO FIGHT PLASTIC POLLUTION AND CLEAN OCEANS FROM MARINE LITTER.

SEAQUAL
INITIATIVE

RECYCLED PRODUCTS FROM
OCEAN WASTE

SEATOWEL

A127-STO (M/L/XL/G)

The SeaTowel is made of **100% recycled materials**. This durable hammamtowel is developed in collaboration with the SEAQUAL® Initiative. Every year, millions of tons of plastic pollute our oceans. The SEAQUAL® Initiative collects marine plastic waste and transforms it into new, high-quality recycled materials. **By supporting this initiative, we contribute to cleaning up our planet, one towel at a time.** Our SeaTowels are produced in Spain using an eco-friendly process that minimizes environmental impact.

Eco-friendly production : No water, paint, bleach or harmful chemicals are used in the production process.

Upcycled cotton : We repurpose colored cotton to create new strong, long-lasting yarn.

Jacquard weaving : Our high-end machines blend SEAQUAL®-YARN and recycled cotton yarn for a beautiful, durable finish.

MOQ : 300 pieces.

Print : Close to required PMS color.

Material : 60% recycled cotton and 40% recycled PET (SEAQUAL®-YARN).

Fabric weight : 280 grams / m².

Sizes : M: 70 x 140 cm / L: 170 x 100 cm / XL: 200 x 100 cm / Giant: 220 x 220 cm.

HS code : 63026000.

Made in : Spain.

GOODTOWEL

A127-GT (S/M/L/XL)

The GoodTowel is a luxurious terry towel crafted from **100% recycled cotton**. Sourced from textile production waste, this towel is spun from new threads and woven using a jacquard technique.

This eco-friendly towel is produced using a natural process that **avoids harsh chemicals, bleach and yarn dye**. This process **saves 5,000 liters of water per towel** compared to fast fashion cotton production. The GoodTowel meets the Deko-tex standard 100 and is produced in Europe.
With every towel you contribute to a cleaner planet!

Including full-color banderole and printed care label.

MOQ	: 300 pieces.
Print	: All-over woven design in 2 colors close to required PMS.

UPCYCLING COTTON

During the production of clothes there is a lot of waste. This waste we use as a raw material for our products. We have a warehouse filled with colored cotton which is used during our 100% eco-friendly production process.

SORT THE FABRIC

Before shredding the raw materials we sort the fabrics carefully. We do not use water, paint, bleach or any other chemical material. To get a correct color we mix multiple color fibers. The mixed fabrics are shredded into pieces multiple times in different machines to obtain small cotton fibers.

DURABLE RECYCLED YARNS

The mixed fabrics are shredded into pieces multiple times in different machines to obtain small cotton fibers. These recycled fibers are our raw materials for our new production. For example the GoodTowel and GoodSocks are produced with these yarns.

0% PAINT, BLEACH OR OTHER CHEMICALS

THE FASHION INDUSTRY IS ONE OF THE MOST POLLUTING INDUSTRIES. WITH THE CUTTING WASTE WE MAKE NEW PRODUCTS WITHOUT WATER, PAINT, BLEACH OR OTHER CHEMICALS. BY PRODUCING PRODUCTS BY UPCYCLING COTTON WE SAVE THOUSANDS OF LITERS OF WATER.

**RECYCLED PRODUCTS FROM
FASHION WASTE**

GOODSOCKS

A127-GS

We transform textile offcuts into new, high-quality yarns for our GoodSocks. During our natural production process **we do not use paint, bleach or other chemicals**. **MANY PACKAGING OPTIONS
FOR GOODSOCKS AND BIOSOCKS**

We begin by collecting and recycling PET bottles, which would otherwise end up in landfills or in the ocean.

The caps and labels will be removed before shredding the bottles into chips.

This way, the newly made products find their origin in PET bottles.

The chips are melted and transformed into strong recycled fibers.

I USED TO BE A CAR

The first step in aluminium recycling is the collection and sorting of aluminium scrap from various sources. Proper sorting is essential for high-quality recycled aluminium. Post-consumer scrap comes primarily from end-of-life consumer products and vehicles. Aluminium cans are a major source.

PRE-TREATMENT AND MELTING

Shredding and crushing reduce the particle size of the scrap and liberate it from other materials, while granulating produces fine particles ideal for melting. Thermal decoating removes coatings like paint and plastic. Once pre-treated, the aluminium scrap undergoes melting and liquid metal treatment to produce refined aluminium alloy suitable for casting.

CASTING INTO DISCS

The molten recycled aluminium is cast into solid disc form. These round discs are directly used to produce an aluminium bottle. An extruding machine press stretches the discs into a long cylindrical shape.

ALUMINIUM IS AN INFINITELY RECYCLABLE MATERIAL

IT TAKES 95% LESS ENERGY TO RECYCLE ALUMINIUM, THAN TO PRODUCE NEW. WHICH ALSO LIMITS EMISSIONS, INCLUDING GREENHOUSE GASES. TODAY, ABOUT 75 PERCENT OF ALL ALUMINIUM PRODUCED IN HISTORY, (A BILLION TONS) IS STILL IN USE. WE USE ONLY RECYCLED ALUMINIUM FROM GERMANY AND SLOVENIA IN OUR BOTTLES.

**RECYCLED PRODUCTS FROM
POST CONSUMER ALUMINIUM**

BOTTLOOP

100% RECYCLED ALUMINIUM BOTTLE

BOTTLOOP

A127-B0

The Bottloop is made of **100% recycled PCR (Post-Consumer Recycled) aluminium**. 95% less energy is consumed in the production of raw materials, and there is a 55% reduction in CO2 emissions during the procurement of raw materials. The aluminium is recycled in Germany and Slovenia and was previously used for consumer products, cars, and cans.

Material transportation has a very low footprint, while the production of the Bottloop takes place in Spain. The Bottloop features a **100% food-grade powder coating**. It has a safe and resistant internal coating of polyimide varnish. The Bottloop is **free of BPA, phthalates, lead, and other harmful substances**. Very lightweight materials and a very tight closure, suitable even for carbonated drinks.

MOQ	: 500 pieces.
Material	: 100% recycled aluminium.
