

SUSTAINABLE CONCEPTS

OUR FUTURE

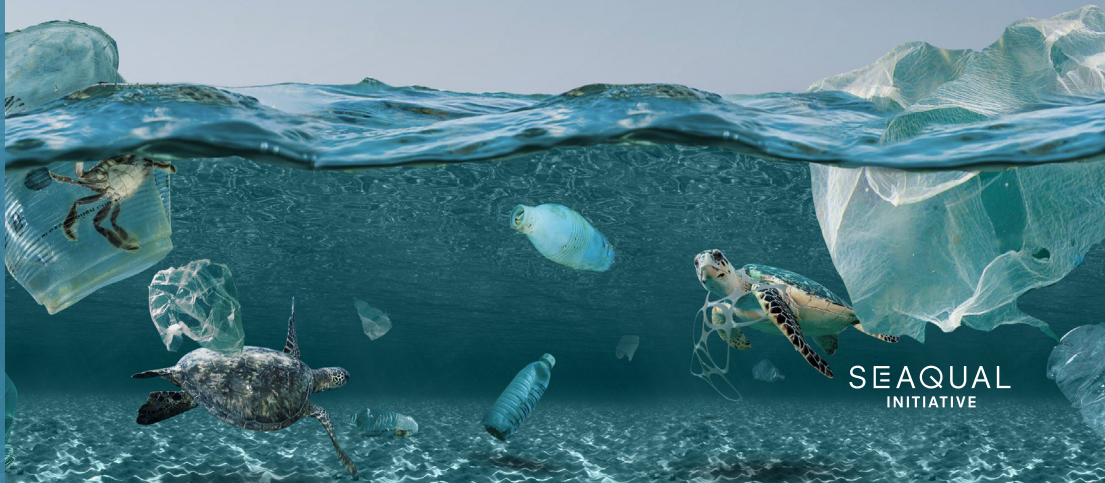

We see a bright future for the next generation. No more pollution in the atmosphere from burning fossil fuels. Clean land and oceans. No new plastics but a circular economy based on recycling and plant based materials.

**RECYCLED
PRODUCTS
MADE FROM
OCEAN
WASTE**

REDUCE, REUSE AND RECYCLE TO SURVIVE

We are partner of the Seaqual initiative to make sustainable products with Seaqual-yarn. Together we want to fight plastic pollution and clean oceans from marine litter. The Seaqual initiative helps inspire people to live in a waste free environment.

SEAQUAL
INITIATIVE

A close-up photograph of a woman's hands holding a mixture of sand and small pieces of plastic debris. She is looking down at the debris with a serious expression. The background is a soft, out-of-focus light blue.

**NO
MORE
PLASTIC
IN THE
SEA**

An underwater photograph of a diver in a blue ocean. The diver is wearing a black wetsuit and fins, and is swimming towards the right. The water is clear and blue, with some light rays visible.

**TOGETHER
WE CAN**

**CLEAN THE
OCEAN!**

**PLASTIC
SOUP** FOUNDATION.ORG

We donate 5% of the profit to the Plastic soup foundation (PSF). The PSF want to reduce the amount of microplastics in the sea. Check what you can do: www.oceancleanwash.org

RECYCLED PRODUCTS MADE FROM FASHION WASTE

0% paint, bleach or other chemicals

The fashion industry is one of the most polluting industries. There is a lot of cutting loss when making clothing. We use this cutting loss to make new products without water, paint, bleach or other chemicals during the production process. By producing products by upcycling cotton we save thousands of liters of water.

UPCYCLING COTTON

1

During the production of clothes there is a lot of waste. This waste we use as a raw material for our products. We have a warehouse filled with colored cotton which is used during our 100% eco-friendly production process.

SPINNING YARN

4

We spin the recycled fibers into a big yarn. After that it is spun into a small strong yarn ready to use again for our new and fresh products.

SORT THE FABRIC

2

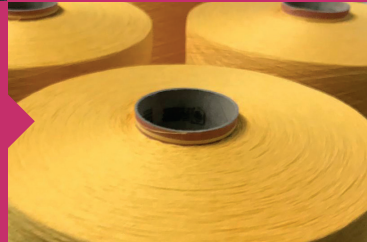

Before shredding the raw materials we sort the fabrics carefully. We do not use water, paint, bleach or any other chemical material. To get a correct color we mix multiple color fibers.

MIXING

5

By mixing colors we can match any color we want. We can combine colors to get a cotton yarn close to a pantone color. This is so you can create wonderful designs and match the products to your style.

SHREDDING COTTON

3

The mixed fabrics are shredded into pieces multiple times in different machines to obtain small cotton fibers. These recycled fibers are our raw materials for our new production.

WEAVING AND KNITTING

6

Our high-end machines can combine cotton and recycled polyester yarns. In this way we can make new durable products with custom made designs.

WE LOVE SUSTAINABILITY AND DURABILITY

We have produced more plastic in the past 10 years than we did in the last century. We have to take action. Start the reduction of virgin plastic, continue to increase recycling and cleaning our planet and reuse materials. Materials which are already available. Besides this we want to make durable products that last.

GREENGLASSES

We offer glasses with a frame that is made of 100% recycled material. The glasses are made of polycarbonate that's been collected post consumer. Your eyes will be protected by the UV400 lenses. We have selected five models, you can personalize with your design and color. We are excited to produce while working on a circular society.

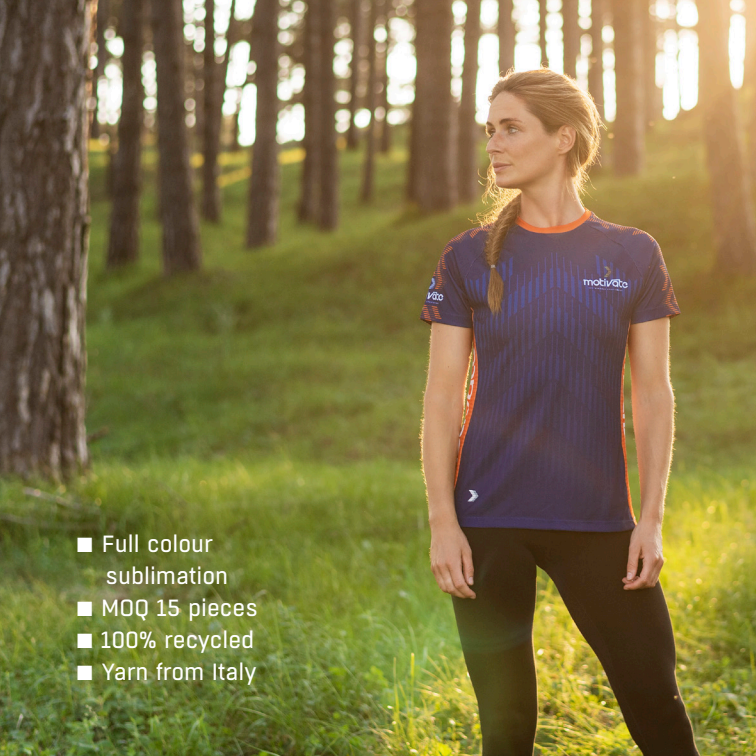

motivate
SUSTAINABLE SPORTSWEAR

 **100%**
RECYCLED
sportswear
produced in the EU

A man with long hair and a beard is shown in profile, leaning against a tree trunk on the left. He is wearing a blue t-shirt with orange accents and the word 'motivate' printed vertically on the side. He is stretching his right leg, holding his right foot with his left hand. The background is a sunlit forest with tall trees and green grass.

**Get
Close to
Nature**

- 
- A woman with her hair in a braid is standing in a forest, looking towards the right. She is wearing the same blue and orange 'motivate' t-shirt as the man. The background is a sunlit forest with tall trees and green grass.
- Full colour sublimation
 - MOQ 15 pieces
 - 100% recycled
 - Yarn from Italy

We are motivated to clean nature

The high quality Motivate sportshirts give you the power to make a difference.

Not only to give yourself and the people around you new energy to set goals and to achieve them, but also to motivate yourself and others to make a difference for the environment.

These shirts are made of 100% recycled PET bottles, so you contribute to make the world a cleaner place.

A cyclist wearing a blue and red Motivate jersey, a black helmet, and sunglasses is riding a road bike on a paved path. The cyclist is in a dynamic, forward-leaning position, suggesting speed and effort. The background is a blurred natural setting with trees and a path leading into the distance.

SAVE ENERGY

60% COMPARED TO CONVENTIONAL COTTON

80% Organic cotton
17% Regenerated eco friendly
polyamide (Nylon)
for strenght &
3% Elastane for stretch

Organic cotton requires 60% less energy and 90% less water than conventional cotton. For the production of organic cotton techniques and materials are used that have a low impact on the environment. For example, the cotton is grown without the use of pesticides or fertilizers and is spun without the addition of chemicals.

RECYCLED
PRODUCTS
MADE FROM **BOTTLE
WASTE**

772.794 BOTTLES

are recycled for the production of Bottlebags last year

We start with recycling the PET bottles, which would otherwise end on the garbage dump

The caps and labels will be removed before shredding the bottles

After shredding, the material will be spun into a fiber

This way, the newly made products find their origin in PET bottles

Durable yarns and products

When the recycling process is done we are able to make beautiful and durable products. The yarns have a wide variety of characteristics and are formed specially for every product.
